1. Allowability of claims 11-27 is withdrawn since the Examiner believes that limitation of (at least) "getter film on a different part of a substrate" does not render the claims 11-27 allowable. Previous Examiner, Ms. Holly Harper, indicated allowability of claims 11-27 due to limitation of the getter film therein. The getter film and other elements, such as electron emitting devices, an electron source etc., as recited in almost all independent claims, are not believed to be part of the (final) precursor product and therefore do not contribute toward patentability of these independent claims. In light of this, the Examiner believes that indicated allowability of claims 11-27 should be withdrawn.

2. In view of applicant's arguments relating to the last restriction requirement, the Examiner withdraws the restriction requirement of claims 5, 6 and 8-34. The Examiner realizes that a basis of the last restriction requirement lacked proper/sufficient reasoning for distinction. Accordingly, the Examiner believes that justification for the last restriction requirement was not adequate. The Examiner however still believes that the instant application alternatively contains claims directed to patentably distinct inventions in terms species as follows:

Art Unit: 2879

- Species I: A precursor featuring an insulating film containing metal oxide, claims 5, 6, 13, 14, 22, 23 and corresponding dependent claims;
- Species II: A precursor featuring antistatic film, claims 11, 18 and corresponding dependent claims; and
- Species III: A precursor featuring sodium blocking film, claims 12, 20 and corresponding dependent claims.

The species are independent or distinct because each of these three features is distinct from the remaining two. The Species I features the insulating film containing metal oxide, not the antistatic film or the sodium blocking film. Species II features the antistatic film containing, not the insulating film or the sodium blocking film. Species III features the sodium blocking film, not the antistatic film or the insulating film. These three features includes no common feature among each other.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is held generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that

a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

3. A telephone call was made to Mr. Frank DeLucia on September 11, 2006 to request an oral election to the above restriction requirement, but did not result in an election being made.

4. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

5. The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction

requirement, the election shall be treated as an election without traverse.

6. Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ashok Patel whose telephone number is 571-272-2456. The examiner can normally be reached on Monday thru Thursday.
